On behalf of Officers and Board of Directors of NAWT, we thank you for your recent participation in the National Association of Wastewater Technicians Education and Certificate Program.

Enclosed are the certificate documents verifying your successful completion of the NAWT Onsite Wastewater Treatment System Inspection Training program. These materials show that you are a trained inspector for a two-year period ending at the end of **November 2020**. To maintain this credential you are required to get eight hours of continuing education within twelve months of your expiration date.

NAWT maintains a national database of inspectors, which is on our website, and works with state agencies to promote broad recognition and acceptance of this program as a standard for meeting onsite wastewater treatment system inspection requirements. If you have requested, you will be included in this registry as long as you maintain your training and the annual registry fee (or as a member of NAWT this is included as a member benefit). The annual registry fee for the next two years has been included in your training fee.

Do not hesitate to contact us if you need additional information or assistance.

Regards,

Kim Seipp
NAWT Education Coordinator

Tyler Shull

Expiration: November 2020
Inspector ID: 14480ITC

A handwritten signature in black ink, appearing to read "Kim Seipp", is written over a thin horizontal line.
